Number of sellers eligible for participating in RA would be rounded off to next higher integer value if number of technically qualified bidders is odd (e.g. if 7 bids are technically qualified, then RA will be conducted amongst L-1 to L-4). In case number of technically qualified bidders are 2 or 3, RA will be between all without any elimination. If Buyer has chosen to split the bid amongst N sellers, then minimum N sellers would be taken to RA round. In case Primary products of only one OEM are left in contention for participation in RA based on lowest 50% bidders qualifying for RA, the number of sellers qualifying for RA would be increased to get at least products of one more OEM (directly participated or through its reseller) if available. Further, if bid(s) of any seller(s) eligible for MSE preference is / are coming within price band of 15% of Non MSE L-1 or if bid of any seller(s) eligible for Make in India preference is / are coming within price band of 20% of non MII L-1, then such MSE / Make in India seller shall also be allowed to participate in the RA process.

Detailed Technical Requirement and Scope of Supply

The **Director, International Centre for Automotive Technology (ICAT)**, a division of the **National Automotive Board (NAB)** under the **Ministry of Heavy Industries, Government of India**, hereby invites bids through a **restrictive bidding process under Proprietary Article Certificate (PAC)** on the **Government e-Marketplace (GeM) Portal** for **“Supply of Overhauling Spare Parts for Horiba MEXA Installed in ETL Department at ICAT Centre – 1, Manesar (Haryana)”**.

Brief Description of MEXA Equipment:

The MEXA series comprises a range of high-precision gas analyzers specifically engineered for the measurement and analysis of gaseous emissions. These analyzers are designed to accurately determine the concentration of key exhaust gas components, including carbon dioxide (CO₂), carbon monoxide (CO), hydrocarbons (HC), nitrogen oxides (NO_x), and oxygen (O₂).

Widely utilized across automotive, environmental, and industrial sectors, MEXA analyzers play a critical role in ensuring regulatory compliance, emissions research, and environmental monitoring. Their advanced technology enables reliable, real-time data acquisition for the evaluation of combustion efficiency and emissions performance in accordance with applicable standards and protocols.

Scope of Supply:

This procurement pertains to the supply of genuine overhauling spare parts for HORIBA make MEXA analyzers, currently installed and operational in the ETL Department at ICAT Centre – 1, Manesar (Haryana – India).

These analyzers are critical for the accurate measurement and analysis of exhaust gas emissions in compliance with applicable emission norms and testing standards. To ensure uninterrupted functionality, optimal performance, and continued compliance with regulatory requirements, periodic overhauling and preventive maintenance are essential. Accordingly, the procurement of OEM-recommended spare parts is necessitated to carry out scheduled overhauling and to replace worn or obsolete components.

The required spare parts must be compatible with the existing HORIBA MEXA systems and sourced directly from the Original Equipment Manufacturer (OEM) or their authorized representatives, to maintain system integrity, calibration accuracy, and warranty conditions.

This procurement is aligned with ICAT’s commitment to maintaining high standards of technical reliability, operational efficiency, and regulatory compliance within its emission testing infrastructure.
